

RoundFix

Round Fix Aluminium External Corner Profile is a corner profile that is used for 90 degree wall outer corners of ceramic surfaces.

It covers the faults of ceramic applications in external corners. It prevents the ceramic from getting abrasion and damaged in the case of possible collisions in the corners. It gives an oval and decorative look to the corner that has been applied.

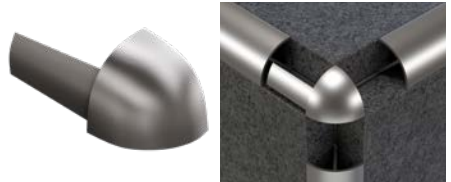

Corner Fix series made for Aluminum External Corner Profile gives you an opportunity to apply it on both inside and outside corner joints easily and in the same time, it also provides a unique integrity by furnishing the profile combination.

Application areas

- Ceramic surfaces of all kinds of 90-degree outer corner applications
- On the top of ceramic or granite skirting boards – Horizontally
- Curves or edges of the ceramic countertop
- Corners of ceramic-coated steps
- As an edge profile with natural stone, granite and ceramics

Round CornerFix

You can make up your inner corner and outer corner joints effortlessly and perfectly with these products which are special to our Round Fix series tile trims.
